

MILLERS OILS

AUTOMOTIVE

## Millers Oils Product Codes and Barcodes Reference

January 2009

### Miller s Oils packaging update information

Over the last twelve months Millers Oils has undertaken a strategic review of the business. As part of this review, we have looked at the Millers Oils branding including the packaging and label offering.

Our overall objectives have been to strengthen the corporate image, raise the quality and consistency of the packaging and improve the identification of our brand across all of the following product groups - Automotive (including Premium, Trident, Motorsport and Classic), Industrial and Commercial Vehicle.

This has resulted in some significant changes that will enhance the look of the packaging and provide a consistency across each of the product groups.

Ultimately this will result in a "new look" range of products that will raise our brand and profile in each market we serve, and reflect the premium position of Millers Oils and our products.

The introduction of our 250ml, 500ml, 1 litre, and 5 litre retail packs, will be phased in between now and the end of the first quarter 2009.

#### **In outline, the changes to the packaging will be as follows:**

All Premium Automotive, Motorsport and Classic products will be in silver packaging.

All Trident, Industrial and Commercial Vehicle products will be in blue packaging.

All fuel treatments will remain in black packaging.

#### **Product Data sheet numbers & Health and Safety Data sheet numbers**

As part of this process, we will be consolidating our internal health and safety codes and product data sheet codes to match the generic product codes (four digit number). Our intention is to have one "Product code" that applies to the product and associated H&S and product data sheets. This will help us to maintain our consistency and ease of use. The product code will be visible on all automotive packaging.

#### **PRODUCT CODES**

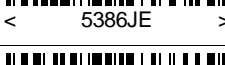

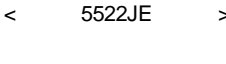

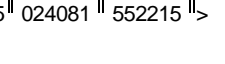

It is anticipated that the majority of 1 litre and 5 litre packs will remain the same. All fuel treatment product codes will remain the same. **This document provides a list of new product codes.**

#### **NEW BARCODES**

The new packs will have a different barcode to previous packs. **This document provides a list of the new barcodes for each product and for each case.**

As you will appreciate, the above changes to our brand have taken an immense amount of time and work by many people within the organisation, but we believe that these changes are essential for the long-term future and success of the business. We really appreciate your support and continued loyalty during this transitional period.

If you have any further questions, please contact Verity Kozuszek, Millers Oils Customer Services Manager.
